LOT PRODUCTION HISTORY PC-01

Flor de Apía is a company that grows, processes and exports quality coffee; These coffees are selected and picked in lots by variety, farm, process, region among other criteria.

In addition, the coffees are prepared in formulations by size and quantity of defects according to customer needs.

The operational and industrial capacity installed by Flor de Apía for coffee production not only allows to transform its own raw coffee; but it can also collect and process lots of coffees from the neighbouring villages.

With the aim of taking advantage of this opportunity Flor de Apía, the collection of lots of regional type coffee started, with which we want to give our customers the opportunity to access a wide variety of types of coffees.

Thus, lot PC - 01 is the result of the collection of coffees from our region.
