Dear Valued Purchaser,

I would like to take this opportunity to thank you for receiving our information package and I trust that you and your team will be able to try our "best" product which is Clearly Canola™.

I am proud to say that our loyal customers swear by this oil-spray and, while they struggle to keep track on their other products, what are they made of, is quality consistent, are they being cheated by diluted products, or serving chemicals in their foods ...with Clearly Canola they have piece of mind, and one less item in their kitchen to worry about.

From a business perspective, Clearly Canola is produced in our SQF level II Certified plant with a very high 94% (94 out of 100) passing score required by HACCP-Based Food Safety initiatives. Last year, the inspector spent 17.5 hours in our plant looking at every aspect in the production, storage and handling of this consumer product. All our products are Kosher certified, Clearly Canola is Pareve certified. We guarantee the quality!

The ingredients themselves are as simple and harmless as they can possibly be. We use healthy pure canola oil, a natural emulsifying lipid (or plant based-fatty acid) such as soy or sunflower lecithin, a tiny bit of food-grade silicon to prevent foaming, and the propellant necessary to expel the oil from the can. As simple as it sounds, however, when formulating the product, the challenge has been stabilizing the ingredients and the oil in a pressurized container. The ingredients get heated at the right temperature and mixed in a precise symphony of steps to give you a stable product, that dispenses at the right pressure and that will stay stable as long as 5 years from the production date. Please know, that other brands, promise the same long shelf life, and although their ingredients are the same, they have faulty blending and canning processes that make the oil precipitate or clump up at the bottom of the can, thus failing within a year or two.

In closing, our Clearly Canola is easy to market, and you can count on our outstanding support as we stand behind our distributors and assist at every step of the supply chain to ensure this product gets to where it needs to be, at the hand of the consumers.

**As we say CLEARLY CANOLA is the CLEAR CHOICE for Food Service Professionals!!
You can read more at www.clearlycanola.net**

Best Wishes,

**Arthur Chan, Founder and President
Clearly Canola by Brilliant Food Concepts Inc.
a Waffles Plus International Company.**

Clearly Canola: a Canola Oil Pan Release without any cholesterol and fat.
Ingredients: Canola Oil, Isobutane, Soy Lecithin, Propane, Dimethicone (food-grade silicone).
Contains: Soy.

Direction: Shake well. Point arrow on button towards dot. Hold can about 30cm (12 inches) from cooking surface. Spray cooking surface, away from heat source, sparks, or flame for 1 to 2 seconds. DO NOT refrigerate container.

Danger: Extremely flammable aerosol. Avoid spraying in eyes. Contents under pressure. Do not place in hot water or near radiators, stoves, or other sources of heat. Do not puncture or incinerate container or store at temperatures over 50°C (120°F). Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep out of reach of children. Use only as directed. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

Antiadhésif Clearly Canola: huile vaporisée au canola, sans cholestérol et gras.

Ingédients: Huile de canola, Isobutane, Lécithine de soja, Propane, Diméthicone (silicone alimentaire).
Contient: Soja.

Mode d'emploi: Agitez bien. Orientez la flèche du bouton vers le point. Tenez le vaporisateur à environ 30cm (12") de la surface de cuisson/inde de la chaleur, des surfaces chaudes, des étincelles, des flammes nues. Vaporisez sur la surface pendant 1 à 2 secondes. Ne réfrigérez pas le contenant.

Danger: Aérosol extrêmement inflammable. Contenu sous pression. Ne pas mettre dans l'eau chaude ni près des radiateurs, poêles ou autres sources de chaleur. Ne pas percer le contenant, ni le jeter au feu, ni le conserver à des températures dépassant 50 °C (120°F). Tenir loin de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et autres sources d'inflammation. Défense de fumer. Conserver hors de portée des enfants. Utiliser seulement selon le mode d'emploi. L'abus délibéré de ce produit par l'inhalation intentionnelle de ses vapeurs concentrées, peut être nocif ou mortel.

Re: Clearly Canola Spray - Fit for Human Consumption Statement
CLEARLY CANOLA: 17oz spray
Waffles CODE: 12282
GTIN: 10686078122822

To Whom It May Concern,

Based on your request, we confirm the following regarding the Canola Oil Spray described hereon:

1. The product was produced from the seeds of Brassica napus and Brassica rapa. These oilseeds are primarily grown in Central United States and are fit for Human Consumption.
2. Storage at all Refined Oil facilities is dedicated to all vegetable origin products.
3. The product does not contain ingredients of animal origin.
4. The product was processed at an officially approved manufacturing plant and subjected to HACCP.
5. The product does not, to the best of our knowledge and belief, contain any harmful additives or infectious or contagious substances.
6. The product is Fit for Human Consumption.
7. The product is made in Canada with Domestic and Imported Ingredients.
8. The shelf life is 5 years from production date.

Sincerely,

Stephen Kwong
Technical Director
Plant Production

Units 23 & 24
Oakville, ON L6H 5V5
Canada

Telephone General Assistance 1-800-243-5533
E-mail Not available.

Emergency phone number Emergency - US 1-866-836-8855
Emergency - Outside US 1-952-852-4646

Supplier Not available.

2. Hazard(s) identification

Physical hazards Flammable aerosols Category 1
Physical hazards not otherwise classified Category 1

Health hazards Not classified.

Label elements

Signal word Danger

Hazard statement Extremely flammable aerosol.

Precautionary statement

Prevention Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use.

Response Wash hands after handling.

Storage Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Other hazards None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
Isobutane		75-28-5	19.55
Propane		74-98-6	3.45
Other components below reportable levels			77

All concentrations are in percent by weight (kg) unless ingredient is a gas. Gas concentrations are in percent by volume (l).

4. First-aid measures

Inhalation	If symptoms develop move victim to fresh air. Get medical attention if symptoms persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Rinse with water. Get medical attention if irritation develops and persists.
Ingestion	In the unlikely event of swallowing contact a physician or poison control center.
Most important symptoms/effects, acute and delayed	Direct contact with eyes may cause temporary irritation.
Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO ₂).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.
General fire hazards	Extremely flammable aerosol.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Use water spray to reduce vapors or divert vapor cloud drift. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Level 3 Aerosol. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

US. ACGIH Threshold Limit Values

Components	Type	Value
Isobutane (CAS 75-28-5)	STEL	1000 ppm

Canada. Alberta OELs (Occupational Health & Safety Code, Schedule 1, Table 2)

Components	Type	Value
Propane (CAS 74-98-6)	TWA	1000 ppm

Canada. Manitoba OELs (Reg. 217/2006, The Workplace Safety And Health Act)

Components	Type	Value
Isobutane (CAS 75-28-5)	STEL	1000 ppm

Canada. Ontario OELs. (Control of Exposure to Biological or Chemical Agents)

Components	Type	Value
Isobutane (CAS 75-28-5)	TWA	800 ppm

Canada. Quebec OELs. (Ministry of Labor - Regulation Respecting the Quality of the Work Environment)

Components	Type	Value
Propane (CAS 74-98-6)	TWA	1800 mg/m3 1000 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Wear appropriate chemical resistant gloves. Suitable gloves can be recommended by the glove supplier.

Other

Wear suitable protective clothing.

Respiratory protection

If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations

When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state

Liquid.

Form

Aerosol.

Color

Not available.

Odor

Not available.

Odor threshold

Not available.

pH

Not available.

Melting point/freezing point

Not available.

Initial boiling point and boiling range

1067 °F (575 °C) estimated

Flash point

-99.4 °F (-73.0 °C) Propellant estimated

Evaporation rate

Not available.

Flammability (solid, gas)

Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	46 psig @70F estimated
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	860 °F (460 °C) estimated
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.13 g/cm3 estimated
Explosive properties	Not explosive.
Flammability class	Flammable IB estimated
Heat of combustion	41.85 kJ/g estimated
Oxidizing properties	Not oxidizing.
Percent volatile	23 % estimated
Specific gravity	0.129 estimated

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents. Nitrates. Fluorine. Chlorine.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information**Information on likely routes of exposure**

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Direct contact with eyes may cause temporary irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Direct contact with eyes may cause temporary irritation.

Information on toxicological effects**Acute toxicity**

Components	Species	Test Results
Isobutane (CAS 75-28-5)		
Acute Inhalation		
LC50	Mouse	1237 mg/l, 120 Minutes

Components	Species	Test Results
Propane (CAS 74-98-6) Acute Inhalation LC50	Rat	52 %, 120 Minutes
		1355 mg/l
	Mouse	1237 mg/l, 120 Minutes
		52 %, 120 Minutes
	Rat	1355 mg/l
		658 mg/l/4h

* Estimates for product may be based on additional component data not shown.

Skin corrosion/irritation	Prolonged skin contact may cause temporary irritation.
Serious eye damage/eye irritation	Direct contact with eyes may cause temporary irritation.
Respiratory or skin sensitization	
Respiratory sensitization	Not a respiratory sensitizer.
Skin sensitization	This product is not expected to cause skin sensitization.
Germ cell mutagenicity	No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.
Carcinogenicity	Not available.
Reproductive toxicity	This product is not expected to cause reproductive or developmental effects.
Specific target organ toxicity - single exposure	Not classified.
Specific target organ toxicity - repeated exposure	Not classified.
Aspiration hazard	Not an aspiration hazard.

12. Ecological information

Ecotoxicity	The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.
Persistence and degradability	No data is available on the degradability of this product.
Bioaccumulative potential	
Partition coefficient n-octanol / water (log Kow)	
Isobutane	2.76
Propane	2.36
Mobility in soil	No data available.
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

14. Transport information

TDG

UN number	UN1950
UN proper shipping name	AEROSOLS, flammable
Transport hazard class(es)	
Class	2.1
Subsidiary risk	-
Packing group	Not applicable.
Environmental hazards	Marine pollutant only when containing 10% or more substances identified as marine pollutants or severe marine pollutant when containing 1% or more substances identified as severe marine pollutants
Special precautions for user	Read safety instructions, SDS and emergency procedures before handling.

IATA

UN number	UN1950
UN proper shipping name	Aerosols, flammable
Transport hazard class(es)	
Class	2.1
